

GT-710 Power Assist Door

Features

GT-710 is an electrical door operator for indoor use.

Accessible, safe and comfortable passage is available.

When the door is pushed / pulled by hand gently, it starts to open automatically to be fully opened.

Manual mode allow passers-by to open easily by hand at power failure and then the door closer close the door.

Adjustable, heavy duty door closer and large chain drive offers the flexibility to adjust the closing force as required.
